

SHONAN GAKUIN HIGH SCHOOL MOTTO

“Not moving forward
means sliding backward.”

Mr. Mitsuhsa Shirato, our school founder, left us with this valuable teaching, which means that young people should always think, choose and take action for themselves and that only these attitudes enable them to move forward. In other words, if a person does not move forward, it suggests that they are not improving and will be left behind by the changing of society. This is the most appropriate lesson for students who are to carve out a future for themselves.

Shonan Gakuin High School

Principles of Shonan Gakuin High School

The Shonan Gakuin High School educational system is based on the following principles with the goal of producing graduates who are able to contribute to society and take on leadership roles.

- 1 To nurture students so that they can grow up to have a sense of community, while learning to develop meaningful relationships, respecting each other and the environment.
- 2 To nurture students so that they can become honest, ambitious and creative adults who are respected by their peers.
- 3 To nurture students so that they can grow up to be productive members of society who are happy and healthy.
- 4 To nurture students so that they can grow up to have academic abilities and effective communication skills for a global future.
